The Biodegradable solution

Biodegradability studies prove Floratech beads are biodegradable

**Floratech is the world's first and best supplier of biodegradable, natural wax exfoliating beads.
Floratech offers a wide variety of options to replace microplastics.
Floratech likely has the optimum solution to formulation challenges.**

- **ecobeeds®**
- **Florabeeds® Jojoba**
- **Florabeeds® Carnauba**
- **Florabeeds® RBW**
- **Florapearls® Jojoba**
- **Florasomes® Jojoba**
- **Floraspheres® Jojoba**

As customers look to replace microplastic scrubbing beads, now is the time to introduce them to Floratech's biodegradable, natural wax exfoliating beads:

ecobeeds® are low-cost, botanical scrubbing beads which provide gentle, yet effective exfoliation. Ecobeeds are multisized and available in all standard Floratech colors.

Florabeeds Jojoba are hard, smooth free-flowing beads of jojoba esters. Florabeeds are an ideal choice for a natural exfoliating bead, available in all standard Floratech colors.

Florabeeds Carnauba are hard, free-flowing beads designed to tolerate a very low pH. Florabeeds Carnauba are available in their natural color.

Florabeeds RBW are hard beads comprised of rice bran wax. Florabeeds RBW are available in their natural color.

Florapearls are hard, monosized spheres of jojoba esters which heighten aesthetic appeal in any product. Florapearls are monosized and available in all standard Floratech colors.

Florasomes are soft, monosized microspheres designed to deliver active ingredients and jojoba emolliency directly to the skin. Florasomes are available in all standard Floratech colors. Custom sizes, playtimes and colors are available upon request.

Floraspheres are soft, monosized beads that disappear completely when rubbed into the skin. Floraspheres deliver jojoba emolliency and aesthetic appeal. Floraspheres are available in all standard Floratech colors. Custom sizes, playtimes and colors are available upon request.
