hard monosized beads

Benefits & Functions:

- Biodegradable
- Globally Allowed¹
- Gentle
- Botanical
- Extensive Color Selection
- Sustainable
- Monosized for Visual Appeal
- Stable

Florapearls

Florapearls are hard spheres of jojoba esters. Jojoba esters originate from jojoba, a plant native to the Sonoran Desert, and are well-known for their moisturizing properties.

Biodegradable Florapearls are monosized to approximately 1000 microns in diameter, to provide a “rolling massage” sensation when rubbed on the skin. Florapearls deliver value to formulations as both a functional and visual enhancement.

Florapearls contain no microplastics and are not restricted by any microplastics legislation.

Florapearls are available in all Floratech standard colors. Custom colors are available upon request.

Gentle

(100x)

Florapearls are an effective exfoliant and are mild on the skin.
